Renovation, Repair & Painting (RRP) Refresher

This 1/2-day (4-hr) class explains how to comply with EPA's Renovation, Repair, and Painting (RRP) Rule. Subjects covered include: regulations, lead safe work practices, cleaning & record keeping. After passing an end-of-class exam, students receive RRP Certificates.

If you took the 8-hour EPA Renovation, Repair and Painting (RRP) class in 2009 or 2010, it's time to renew your certification!

Renewal is easy as long as you complete a 4-hour Refresher class before the expiration of your current certification. You will be re-certified for five (5) more years from the date you complete the Refresher class.

However, if you don't complete the RRP Refresher before the expiration of your current certificate, you must re-take the initial 8-hour RRP Initial Class!

**Contact our office to reserve your spot today!

- Golf Cart Path Work
- Concrete Curb and Gutters
- Concrete Flatwork

While you can't 'clone' yourself yet, it is possible for a Sole Owner to 'multiply' his contractor licensing opportunity. A short answer for a long question and good news from Arizona resolving an issue and updating our Q&A from a recent column...

Q: I have a General Building license and I want to also get a "C-36" Plumbing license. The CSLB told me to complete an Additional Classification application so I did that and submitted it, however now I'm thinking that I'd like a separate license number for the plumbing business. Can I have more than one Sole Owner license?

A: Yes, an individual can have more than one Sole Owner license. In fact, there is no limit to how many Sole Owner licenses a person can have. However, in your case you will need to withdraw your Application for Additional classification in order for the CSLB to process the application for a new license.

Q: We recently merged our corporation in to a Limited Liability Company (LLC), both of which hold active contractor licenses. The Secretary of State shows the corporation as "merged out", but the CSLB still shows that our contractor's license is active and doesn't expire until August. The LLC currently only holds the "C-10" (Electrical) classification while the corporation has the B (General Building) along with many other classifications. Can we still use the corporation license to sign contracts for work that doesn't fall under the "C-10" (in which case we'd use the LLC license) since the license is still active? We plan to move all the classifications from the corporation's to the LLC's license but obviously that will take some time.

A: Even though your license is still active, technically the corporation no longer exists so you should not be doing business under that entity.

Q: My license is currently Suspended due to a judgment (which I am working on resolving) but I received a renewal notice. Do I still send in the renewal even though it's Suspended?

A: The CSLB will not renew your license as Active until you clear the Suspension. You can still send in the renewal on time with the appropriate fee to avoid the delinquent fee, but if you don't have documentation along with it showing the judgment has been resolved the CSLB will send you a rejection/correction letter asking for whatever is required to clear the Suspension.

In a recent column we addressed a reader's question regarding a notice he received from the Arizona Department of Revenue stating that contractors were no longer required to have a TPT (Transaction Privilege Tax) license. At the time, the Arizona Registrar of Contractors (ROC) was in fact still requiring that contractors maintain their TPT license, however they were working with the Legislature to eliminate this requirement.

The ROC was successful in making the law consistent with the Department of Revenue and they no longer require that a TPT license be obtained for a contractor's license, nor are contractors required to maintain existing TPT licenses.

While knowledge is power, knowing where to go for the answers is half the battle. Get expert assistance immediately when you call 866-443-0657, email info@cutredtape.com, or write us at Capitol Services, Inc., 1225 8th St. Ste. 500, Sacramento, CA 95814. Research past columns at www.cutredtape.com.

Are you covering the cost of your Employee's Individual Medical Policy?

Central Coast Builders Association

6/20/2014

Caution for Individual Policy Reimbursement

The IRS uses a FAQ on Employer Health Care Arrangements to highlight the potential liability for employers that, rather than establishing a group health plan, merely reimburse employees for the cost of their individual health plan premium.

Q1. What are the consequences to the employer if the employer does not establish a health insurance plan for its own employees, but reimburses those employees for premiums they pay for health insurance (either through a qualified health plan in the Marketplace or outside the Marketplace)?

The IRS makes it clear that the consequence is that the employer may face a penalty.

Specifically, as explained in [Notice 2013-54](#), employer reimbursement plans are considered to be group health plans and therefore subject to the market reforms, including the prohibition on annual limits for essential health benefits and the requirement to provide certain preventive care without cost sharing. Notice 2013-54 clarifies, however, that employer reimbursement plans cannot be integrated with individual policies to satisfy the market reforms.

Consequently, the employer may be subject to a \$100/day excise tax per applicable employee (which is \$36,500 per year, per employee) under [Code Sec. 4980 D](#).

*Let us help design your program to avoid this penalty.
By Mike Carlson, Builders Association Health Plan
mcarlson@craford.com or 415-755-6325*

Craford

*Changes to
expect:
...*

For plan years beginning on and after January 1, 2014, employers should carefully evaluate arrangements under which they reimburse employees for premiums, or are otherwise involved in the purchase of individual health insurance policies that provide non-excepted medical coverage (i.e., coverage that is subject to health care reform's mandates) for employees. These arrangements create significant compliance concerns under health care reform. Furthermore, these individual policies should not be paid for or reimbursed on a pre-tax basis under an employer's cafeteria plan. As described in more detail (left).

As we ring in the new year we are beginning work on our 2015 Membership Directory. We are asking that you please check your current listing and verify that the information is correct.

You can do this by going to our website www.ccbabuilds.com

Please email staff@ccbabuilds.com with any changes that need to be made.

We have contracted with E&M Consulting again this year and they will be sending you a fax shortly followed by a phone call in the future. Please speak with their representatives about the great marketing opportunities that they will have available for this year's directory.

Thank You For Your Time,
Christie Cromeenes & the CCBA Staff

The Don Chapin Co. Inc is an equal opportunity employer. All applications will be considered.

Safety Tip of the Week

EXTENSION LADDER SETUP

There are several types of ladders in the construction industry. Extension, step and job made ladders are what we see and use most of the time. No matter what type, ladders with broken or missing rungs, damaged side rails, defective construction or improperly set up should not be used. Let's review some important points when setting up and using extension ladders.

If the extension ladder is in good condition, make sure the latches secure properly and the slip resistant feet are present. Get help to move heavy ladders and don't raise it until you check for any overhead power lines, check the surface the ladder will rest on to be sure it's stable and that the ladder is not near vehicle or equipment traffic or too close to the kettle. Don't rest it on gutters, glass, or weak supports. Extend the ladder at least three feet above the landing with a slope of 1 to 4, (for every four feet in height the base should be one foot away from the building). Secure the base from kicking out from the building and have a coworker hold the ladder until you can secure it at the landing. Check to be sure the landing and area around the base are free of debris which cause a coworker to trip or fall.

Now the ladder is ready for use but coworkers should be trained on using the ladder safely before they climb.
